MINEA

MINEA is a 2x2 stream Milan-certified audio module. It's a ready-to-go solution that allows manufacturers in the Pro Audio market to quickly and easily implement Milan into their products, from single loudspeakers, amplifiers, microphones, audio embedders & de-embedders to complex multichannel mixing desks and multi-port conferencing systems.

Features & Benefits

✓ Ready-to-go solution for manufacturers

✓ Quickly and easily develop Pro AV devices built on MILAN

✓ Saving development time and costs

✓ Milan certified modules. No additional certification required by manufacturer!

✓ New membership @AVNU: Milan Associate

✓ Direct technical support for implementation and testing by Neutrik

✓ Backstage Portal for online support & configuration

Today the demand for professional, real-time, reliable, and future-proved audio network systems is growing rapidly. Manufacturers in the Pro AV industry want to focus on the core values of their products and when it comes to audio networking they want to rely on an open standard, defined by the industry.

With the development of Milan audio modules, Neutrik is taking the next logical step by offering OEM customers a time- and cost-saving path towards developing and producing future audio network solutions built on the Milan protocol.
