

## Features \& Benefits

- Innovative and compact patching system (just 1U high) for 19" rack mounting
- High quality long life gold plated Neutrik prewired double jacks with best contact integrity
- Convenient change of normalling with the aid of jumpers

## NPPA-TT-IDC

$2 \times 48$ TT (Bantam) jacks, half normalled bottom row, fast and easy change of normalling with jumpers, 288 Krone-type IDC terminals, individual grounding

All NPPA patch panels are fitted with high quality, long life NJ3TTA gold plated double contact jacks ( $2 \times 48$ ), featuring best contact integrity. The unit, robustly housed in a black coated steel shell, is finished off with a built in cable bar and two large channel identification strips for perfect management of the system. The NPPA patch panels are an innovative and compact patching system (just 1U high) for 19" rack mounting.

- Robustly housed in a black coated steel shell
- Qualified for analog and digital signals acc. AES3, 48 kHz sampling frequency
- Flexible grounding system (see Assembly Instruction)
