## Neutrik Press Release

# Neutrik NA2-IO-DPRO Mic Preamp Control Added To Yamaha CL/QL Series

Schaan, Liechtenstein, November 2020. Neutrik, the leading supplier of robust and reliable professional connectivity solutions for audio, video, and data, is pleased to announce new options to remote control preamps of their new DANTE network device NA2-IO-DPRO.

*"There's no doubt that the future within the Pro AV market is based on interoperability between different devices within an application. We have found the perfect partner with Yamaha to enable this feature for better ease of use and excited customer experience,"* says Florian Frick, Product Manager for Neutrik.

With the recently added CL/QL firmware update version 5.6 Yamaha added this specific support for Neutrik's new DANTE network device. The NA2-IO-DPRO is Neutrik's small but powerful I/O solution to add more flexibility in a network setup for Line, MIC and AES signals.

*"Yamaha is delighted to have been able to integrate control of the NA2-IO-DPRO into the CL/QL series with the release of our V5.6 firmware,"* says Motome Tanaka, Yamaha Manager, Marketing and Sales Group. *"This collaboration further extends the options for CL/QL systems. In combination with the R series, customers can make their systems even more flexible."*

Using the DPRO for example on a truss, is a convenient way to establish ambient miking with short cable runs and then remote control it via Yamaha CL/QL consoles is a real improvement for a Pro AV work environment.
