# Compact Acoustical Analyser

The Acoustilyzer AL1 is a handheld sound level meter and acoustic analyser for measuring and monitoring of sound pressure level at concerts, room acoustics and speech intelligibility STI-PA. The practical blend of electrical and acoustical functions, combined with computer connectivity, positions AL1 to be an indispensable tool for every sound/system contractor, installer and multi-media specialist. The sound level meter meets the standards DIN 15905-5 and SLV 2007.

## Features & Benefits

- ✓ For event monitoring

- ✓ Preventing exceeding levels

- ✓ Simplifies PA setups

- ✓ Class 1 calibrated analyser

- ✓ Free online updates
